Sir:

The purpose of this letter is to offer testimony on the health benefits of raw milk.

My husband, William Braun, MD, is a physician who regularly recommends raw milk to his patients. We have personally experienced wonderful health benefits from consuming raw milk. We are extremely concerned that the State of PA is using our tax dollars to unfairly target raw milk producers who have permits, thus making it difficult to obtain raw milk in PA.

Please be aware that not only does raw milk contain vital nutrients for radiant health, it also serves as an economic boon to rural PA farmers. Some of these farmers have literally been saved from economic disaster by the sales of raw milk. Therefore, making raw milk easily obtainable in PA serves a two fold purpose. Firstly, it serves to contribute to the financial prosperity of rural areas and secondly, it contributes to the overall health and vitality of our residents.

It is a constitutional right of every resident of the Commonwealth to be able to procure fresh raw milk. As our legislators, please do your part to preserve our rights to this most vital commodity.

Thank you.

Sincerely yours,
