Subject: [Possible SPAM] Raw Milk - pro

Dear Senator Brubaker:

As a individual who has Diabetes, I do not do well with whole milk, either fat or non-fat, but I have found that the raw milk, especially from goats has enabled my system to maintain adequate gulclose levels so that I may control my Diabetes without medication, utlizing Naturopathic Medicine and diet.

The vital enzyenes and vitamins are destroyed by homognizing milk which my system needs to fight Diabetes.

Please support the movement to allow farmers to sell raw milk to those of us who want and need it. And for those who do not they can purchase the homognized milk at their local grocery store.

Also please support to allow us to choose the form of medical/wellness program that we feel best benefits our own personal health. In my case that would be Naturopathic and Homeopathic medicine, which incidently is much cheaper that the current program offer by the Allopathic medical community.

Respectively submitted,

John L. Herr
