Dear Senator Brookes:

I am writing to say how strongly I feel about the benefits of raw milk products to my health and the necessity of having easy access to obtain them. I was diagnosed with osteoporosis and chronic fatigue 14 yrs. ago. I had exhausted my finances seeing doctors, clinics, specialists, alternative approaches and ended up taking Fosamax and other expensive medications. It was recommended by an allergist for me to try raw milk products. After four years of using these products I no longer take any medications and my osteoporosis is no longer present. I have the DEXA scans to prove it. It's pretty amazing! The KeFiz and yogurt have aided my sleep and energy levels where my fatigue is improved.

Overall I believe I owe my health to RAW milk products and have great fear one day I won't be able to obtain them. I would ask that you would work to amend the regulations so that there is no permitting necessary for direct sales of raw milk to consumers. I believe it is my constitutional right to enter into private contractual agreements with raw milk Dairy Farmers and pray that you work to make this always possible!

Thank you so much for serving on this committee and dealing with such an important issue.

Sincerely,  
Deborah A. Massey
